

What would you do if you no longer had a mortgage payment?

**Take more vacations?
Purchase investment properties?
Start your own business?
Retire?**

With the Money Merge Account, or MMA we can show you how to pay off your 30 year mortgage in as little as eight to ten years or less without increasing minimum mortgage payments and without any lifestyle changes. The MMA works virtually like your standard checking or savings account, except that it has the ability to offset large portions of interest on your mortgage each time you deposit income into your account.

With the MMA, your money doesn't just sit in your checking or savings account waiting for you to pay your expenses. Instead, it is actually being put to work every minute it is in your account to significantly reduce interest on your mortgage.

The MMA is 100% secure, 128-bit encrypted, web-based system which allows you to monitor your account and interest savings 24 hours a day, seven days a week. Once your MMA is activated, you have access to your money through checks, debit cards and ATM. As you continue to deposit your income and pay expenses like always, you will now save time and interest on your mortgage.
